SVDP WINS GRANT FOR WEATHERBUG STATION

St. Vincent De Paul Catholic School has been awarded a \$10,000 Grant from British Petroleum through its **A+ for Energy** program. The grant proposal was authored by school board member Allison Edwards.

Over the past three years, British Petroleum has given \$6.5 million in grants and scholarships to Pre-K through 12th grade teachers in California and Texas through their **A+ for Energy** educational program. This program is designed to recognize innovative approaches for teaching students about energy, energy conservation, and alternative energy choices. Funds from this grant will be utilized to implement energy education school-wide, with a focus on wind energy and weather. The WeatherBug meteorological tracking station, which measures 27 different weather parameters, will be installed at SVDP (see right). This weather station will connect us to the Homeland Security tracking system and allow us to communicate with other WeatherBug stations. The WeatherBug Network is the largest weather network in the world. More than 8,000 schools across the U. S. operate using the [WeatherBug Tracking Stations](#) to integrate live, local weather data and technology into classroom learning. Our children will be able to visit other stations via podcasts all over the world. As a recipient of this grant, we will be eligible to renew our application annually.
