

**Learning can be easy for teachers too! The training required for most education technology costs money and time and often does not cover teacher development, i.e., how to efficiently use the technology and correlate it to the classroom environment. With regular staff turnover and reassignments, training can become a major expense category that prevents many schools from pursuing new technologies. WeatherBug Achieve offers flexible training options that meet the need to today's teachers.**

WeatherBug Achieve includes training that can be accessed whenever and wherever it is most convenient for teachers - at home, at school, before class starts or in the evening. The web-based training modules are found in the Teacher Pages of Achieve. The modules are divided into easy-to-learn topics that last no more than 5 to 20 minutes each. They can be viewed on any computer with an Internet connection as many times as needed! AYC Training is included with your WeatherBug Achieve membership.

*The At Your Convenience (AYC) Training includes 18 modules that last from 5 to 20 minutes each. Here are some of the topics currently available and we are always adding more:*

Module 1: <b>How Your Weather Data Gets to WeatherBug Achieve</b> Outdoor/Indoor Equipment, Troubleshooting	8 min	Module 6: <b>Using Map Gallery &amp; Weather Maps in the classroom</b> How Topography Impacts Weather, Comparison of Weather Maps	10 min
Module 2: <b>Accessing WeatherBug Achieve School Key Code/Subscription</b> Teacher Login, Student Access	5 min	Module 7: <b>Activity Explorer</b> Search for Appropriate Lessons, State Standards	8 min
Module 3: <b>The WeatherBug Achieve Main Page</b> Layout, Quality Check, Overview of Materials Included	12 min	Module 8: <b>Archiving Articles, Images, and Data</b> Cut/Paste Functionality, Adding questions to articles in Word	5 min
Module 4: <b>Accessing Your Weather Observations</b> Overview (Using and Archiving), Daily Graph and Parameter Interaction	10 min	Module 9: <b>Creating Graphs from Data</b> Tables in a Spreadsheet, Using Chart Wizard functionality in Excel to create graph, Cut/Paste into Word for lesson creation	13 min
Module 5: <b>Using WeatherBug Camera Images to Make Connections</b> Overview of Using Camera Images, WeatherBug DataCam	18 min		

### Onsite Training

*WeatherBug can also bring our training to your school and staff through a one-day, hands-on, in-person training program.*

*One of our professional trainers will come to your school and work with the staff to get the teachers and the program up and running. They will present and review applications like mapping and graphing, camera images, live and historical data and the interactive lessons. They will also discuss using information collected by other schools, the measurements taken by the weather station and demonstrate ways to use standard software programs, such as Excel or PowerPoint, to utilize the data and develop additional classroom lessons. Onsite training can be customized to meet each school's individual needs and offers the benefit of in-person interaction, demonstration of station set-up and a customized focus on your school set-up.*

*Onsite training can be arranged for an additional fee.*

### WeatherBug Training Team = Certified Experience

*WeatherBug Achieve's Professional Development trainers are certified educators with over 50 years of educational and professional training experience between them.*
